Location: Cancer Support Community
530 Hampshire Road
Westlake Village, CA 91361

Cost: Free

RSVP: (805) 379-4777

Advanced Molecular Imaging and Stereotactic Radiation- A Team Approach To Diagnosing and Treating Recurrent Local Prostate Cancer:

We are pleased to have Dr. Fabio Almeida, the Medical Director of the Southwest PET/CT Institute, speaking about the use of Carbon-11 imaging for locating prostate cancer metastases. He is a nationally recognized expert on this technique and he will be sharing his understanding of this highly useful diagnostic tool. We will also have Dr. Gregg Dickerson, a leader in the use of stereotactic radiation therapy, joining the discussion to discuss his collaboration with Dr. Almeida in treating patients with recurrent local prostate cancer. He will also discuss his experience with the management of primary prostate cancer with CyberKnife radiation therapy. Come prepared to listen, learn and ask questions.

The Prostate Networking Group is a monthly support group for men with prostate cancer. Family members are also welcome. We meet every third Saturday of the month from 10:30am - 12:30pm and provide information and emotional support in fighting prostate cancer.

This activity is supported by an educational grant provided by Genentech.
